Figure 1 is a schematic diagram illustrating a grid-based system. The diagram is divided into two main sections. The left section shows a 4x4 grid of squares. A closed loop, labeled 200, is drawn around the perimeter of the grid. A label 202 points to the bottom-left corner of the grid. The right section shows a 4x4 grid of squares. A closed loop, labeled 204, is drawn around a subset of the grid, specifically enclosing the top-right 2x2 area. A label 206 points to one of the squares within the loop.
